

Helpful Hints

AWS-110 Wet Stone Cutter

- Read and follow the instructions in the operating manual thoroughly.
- Take care to ensure that the cutting area is clear of debris and no one will be in a position to interfere with the cutting application.
- Select the right blade for the specific cutting application.
- Before beginning your cut, make sure that the power cord is routed behind you.
- Use slow, steady pressure while cutting.
- Blow out the cooling vents to dry up any moisture periodically.
- Step-cut on thick materials.
- Take care to prevent moisture from entering into the cooling vents.
- Keep felt strips clean of debris to avoid possible scratching of the material.
- Use the Guide Rail System with your AWS-110/220 Wet Stone Cutter.
