

Hardscape Installation Workshop

LSU AgCenter — Hammond Research Station
21549 Old Covington Hwy—Hammond, LA, 70403

January 19th, 2024

The LSU AgCenter Hammond Research Station and the LNLA are pleased to announce a hands-on workshop providing the opportunity to learn how to install hardscape features. This event will be **co-hosted and sponsored by Natural Paving USA** (<https://www.naturalpavingusa.com/>), where we will be constructing a patio on-site at the Hammond Research Station.

This event will include a classroom portion, covering the proper way to design, build, and maintain hardscape features in the landscape, as well as a demonstration to show each step in the process.

To provide the best possible educational materials for this event, we encourage you to fill out our pre-event survey and email your answers to Dr. Damon Abdi at the Hammond Research Station (dabdi@agcenter.lsu.edu). The **survey and registration** can be accessed by using the QR code below or visiting <https://lnla.memberclicks.net/hardscape-workshop>
