SPIKE DIAMOND DISC + ECOGUARD TYPE G

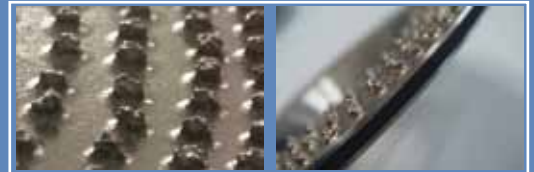

**Surface Preparation made Easy.
Virtually Dust-free!**

Patented technology makes this unique product available for "Clog-Free" coating removal for epoxy, urethane, glue and adhesives for surface preparation. An Open-mesh diamond layer removes debris fast avoiding heat buildup. Each diamond bead was made with multiple diamond grits to maintain a sharp cutting capability for a long time. The Spike Disc has a sandwiched-rubber cushioned light-weight body that reduces noise and vibration, so that operator can work for longer periods of time. Spike Disc is available in 4.5", 5" and 7" with a 7/8" arbor or a 5/8"-11 zinc hub. **Combine with the Ecoguard Type G for a dust-free grinding solution!**

Ecoguard Type G

ULTRACUT APR SERIES — Hybrid Blade for Intricate and Flush Cutting Applications

The Alpha® Ultracut APR Series combines the high-performance of the Alpha® Ultracut GPM Series with our unique design for flush cutting applications. Unlike other blades, the Ultracut APR Series blade accepts our exclusive Quad Drive Adapter, which eliminates the required locknut, so it is perfect for “flush cutting” applications. For a quick and easy solution, use this blade to completely remove anchor bolts, concrete re-bar and pipe from floors and walls. This blade brings accuracy and precision flush cutting to the manufacturing facility or the jobsite.

Ultracut APR

ECOGUARD TYPE W — Dust Collection Cover for Wider Kerfed Blades

Alpha® introduces the Ecoguard Type W. Unlike the Ecoguard Type C which uses a supplied dust collection bag, the Ecoguard Type W must be used with a vacuum, or other dust collection system, to successfully collect the dust and larger particles derived from using wider kerf diamond blades such as the Alpha® Tuck Pointing or Crack Chasing blades. The Ecoguard Type W includes three unique features. First is the ability to easily adjust the cutting depth by using a simple wing nut operation. The second is the nose guide that indicates the cut line and the third is the ability to view inside the cover, while cutting, due to the clear polycarbonate material construction. This feature is quite useful during Tuck Pointing applications.

Ecoguard Type W

EVENT SCHEDULE: 5PM-8PM

MAY

WEDNESDAY, MAY 28, 2014
Scarborough Branch
416.609.3972

THURSDAY, MAY 29, 2014
Mississauga Branch
