SPIKE DISC

Spike Disc - this discs removes coatings/ materials quickly without damage to the concrete surface. It also has a unique open-mesh diamond layout to eliminate clogging problems, thus avoiding heat buildup.

HSG-125

HSG-125, High-Speed Angle Grinder - the ultimate workhorse for Stone Fabricators and Tile Contractors. It is versatile and can be used wet or dry. Attach to the Alpha® Ecoguard System to create a dust-free operation.

ECOGUARD TYPE G

Ecoguard Type G - a dust collection cover for grinding applications. This dust collection cover creates a virtually dust-free environment when connected to a vacuum.

HEPA DRY VACUUM

HEPA Dry Vacuum - provides an unbeatable combination of features and performance. The 2HP motor generates enough suction to pick up almost any kind of material. The drop-in style filter has a minimum efficiency of 99.97% at .3 microns.

AWP-158

AWP-158, Portable Electric Polisher - is designed for polishing, shaping, core drilling and light grinding and has a center water-feed system. This 7.8 amp, 800-watt, 3,000 RPM machine is a powerful workhorse suitable for use in the shop or on the job site. There is a flat polishing caster designed to improve stability during scratch removal operations for a better final finish.

VEXCEL RIGID GRINDING DISC

Vexcel - is designed for heavy duty material removal applications. The Rigid steel base with a curved design creates a very aggressive grinding action and the fluoroc rubber backing reduces noise and vibration. It minimizes sparking so you can avoid toxic air and pollution.

CERAMICA DRY

Ceramica Dry - perfect for all natural stones and cement-based composites. The grit sequence is specifically formulated to provide the best possible finish.

CERAMICA EDGE

Ceramica Edge - this is a cost-effective, reformulated version of the original Ceramica polishing system, that enables fabricators to match the edge with the slab's surface polish. **For wet use only!**
