

## Employee Safety in the Stone Industry

---

**Date:** Thursday, October 13, 2016  
**Time:** 5:00 to 8:00 pm  
**Speaker:** Randy Hauser, New Jersey Department of Labor  
**Location:** CCS Stone, Inc, 9-11 Caesar Place, Moonachie, NJ 07074

---

What are the real costs associated with making your shop safer? How has the stone industry addressed the proposed OSHA Silica Rule change? This session will discuss the resources available through the OSHA's Onsite Consultation Program. Come away from this session with the tools to create a safety program that addresses silica exposure, baseline testing, and a number of issues your employees will encounter.

### Learning Objectives:

- Learn about the OSHA Onsite Consultation Program.
- Review baseline testing options and how these will protect your employees and company.
- Identify tools available to help employers ensure a safe work facility.

### Attendees will receive:

- Safe Slab Handling Module & New Installation Safety Training Video (see attached)
- Lite Fare Provided by CCS Stone

### Registration Fees

**NY Metro Participant: Complimentary**

**MIA+BSI Member: \$25**

**Nonmember: \$50**

# Safety Training for Installers

This video is the Institute's first collection of video modules focusing solely on installation safety, highlighting the fact that there is a striking difference between shop safety, where the environment is familiar, and being on location, where each setting is different and requires a clear plan of action.

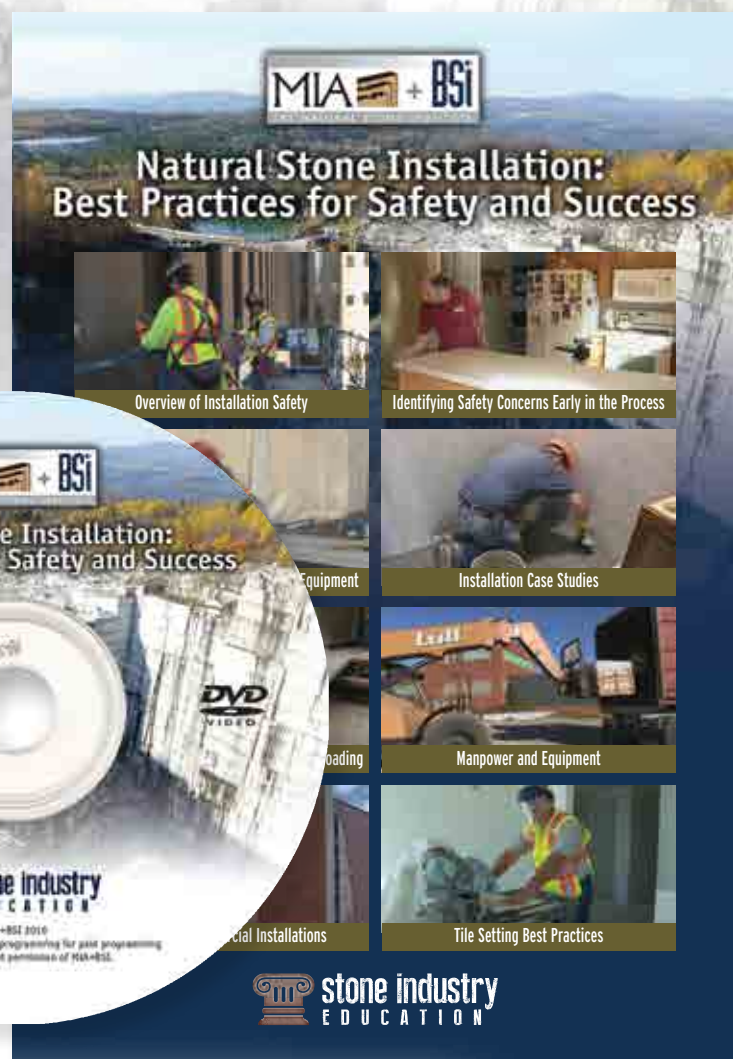

## Modules address the following topics:

- Overview of installation safety
- Identifying safety concerns early in the process
- Requirements for personal protective equipment
- Installation case studies
- Best practices for material loading and unloading
- Manpower and equipment
- Large-scale commercial installations
- Tile-setting best practices

*"This is a great training resource for anyone sending installers into the field. Training our installers to be safe and professional can only enhance the value of our products and help retain great employees."*

Jon Lancto  
MIA Vice President
