Fred Hueston, PhD
Stone and Tile Forensic Specialist

STONE and TILE INSPECTION & TROUBLESHOOTING Seminar and Workshop

January 19 - 22, 2015
Las Vegas, NV

Stone and tile problems are on the rise and many of these issues are affecting fabricators, installers and restoration contractors, etc. Many of these problems are hard to diagnose and more importantly not easy to fix. Stone Forensic expert Dr. Fred Hueston is presenting an intense four day seminar on these issues which will not only qualify you as an expert but will also help you solve and fix many of the stone and tile issues you many run into. This seminar is being conducted in Las Vegas at the same time as Stone Expo. The class size is limited and already starting to fill up.

This class covers all aspects of stone inspection and troubleshooting, including:

- The geology of stone and marble
- Identification of stone and marble
- Quarrying techniques that affect the final product
- Production of tiles and slabs
- Fabrication and installation requirements
- Physical and chemical testing
- Diagnosis of problems
- Stone restoration, including refinishing and polishing
- Filling and tile replacement
- Grinding and polishing
- Stain removal
- Other tricky stone situations

First come, first served. Class size is limited!

\$2,500.00 per person

Are you a Stone and Tile PRO Partner? Remember to ask for your discount!

The marble and stone inspection certification covers all aspects of marble and stone such as limestone, granite, terrazzo, slate, onyx and quartzite and their use in flooring and other applications. This includes stone restoration, fabrication, polishing, burnishing and repairing. As well as how to evaluate installations, understand crack propagation, and troubleshoot

failures and problem solving. Problems such as efflorescence, subfluorescence and lippage are covered. The use and choice of grout, mastic, epoxy, slip membranes, crack suppressors and support and underlayment systems are included. This class or course is approved for certification; certification is necessary to becoming a third party inspector or expert witness.
