

# SPIKE RULER

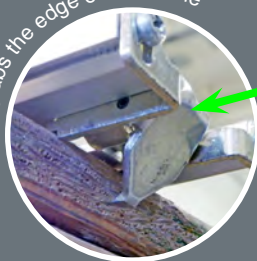

ALUMINUM PRECISION RULER WITH WOODEN BASE

The Spike Ruler is designed for professionals who require a precision ruler that will not move on thin porcelain tiles or panels with smooth or texturized surfaces. The spike at the top grabs the edge of the worktable to secure the ruler so that the material can be cut along the ruler to ensure the straight cut. If the wooden base is removed, the precision aluminum ruler can be used for the EZ Thin Tile Cutters as well.

PART NO.	SIZE	DESCRIPTION
