

Helpful Hints

G-Tape HVAC (Nichigo G-Tape™)

- Avoid prolonged contact with skin. May cause irritation.
- Do not use as an electrical insulation tape.
- This tape may damage or peel of the delicate surfaces and leave a residue when removed. Test before use if a residue or a surface damage is a concern. A 91 % isopropyl alcohol (IPA) available at drug stores easily removes residues if any.
- Use only clean, dry surfaces.
- Store in a dark, dry, cool place.
