## Section 11: Toxicological Information

### ACUTE EXPOSURE

**Eye Irritation:** Moderate to strong eye irritation. Based on data from components or similar material.

**Skin Irritation:** Not expected to be a primary skin irritant. Based on data from components or similar material. Prolonged or repeated skin contact as from clothing wet with material may cause dermatitis. Symptoms may include redness, edema, drying, defatting, and cracking of the skin.

**Respiratory Irritation:** If material is misted or if vapors are generated from heating, exposure may cause irritation of mucous membranes and the upper respiratory tract similar to that observed with mineral oil. Based on data from components or similar materials. Under good industrial hygiene practices where all exposure limits are observed, respiratory irritation should not be a problem.

### CHRONIC EXPOSURE

**Chronic Toxicity:** No data available to indicate product present at greater than 1.0% are chronic health hazards.

**Carcinogenicity:** No data available to indicate product present at greater than 0.1% are a carcinogenic hazard.

**Mutagenicity:** No data available to indicate product present at greater than 1.0% present a mutagenic or genotoxic hazard.

**Reproductive Toxicity:** No data available to indicate product present at greater than 1.0% present a reproductive hazard.

**Teratogenicity:** No data available to indicate product present at greater than 1.0% present a teratogenic hazards.

### ADDITIONAL INFORMATION
