

PRESS RELEASE

Alpha® Introduces New Blade for Pneumatic Cut-Off Tools

Oakland, NJ

09/04/2014

Alpha Professional Tools® is proud to announce that we have expanded our line of quality products. Below is a brief introduction of these new products.

The [Ultracut ABM Series Blade](#) is designed for use on most popular pneumatic cut-off tools which are widely used in automotive body shops and many other industrial manufacturing facilities. Unlike regular abrasive cut-off wheels, the Alpha® Ultracut doesn't change diameter during the cutting operation. It will maintain the maximum cutting depth throughout its life. The Ultracut was made with the highest quality diamond grits allowing you to cut multiple layers of different materials while assuring a fast, clean cutting experience. The Alpha® Ultracut has bi-directional rotation so that you can use on reversible cut-off tools, which could be useful to direct sparks and debris away from the operator. It is available in 3" and 4" sizes.

Part No.	Size	Thickness	Maximum RPM	Arbor(s)
ABM0338	3"	1.5mm	20,000	3/8" (10mm)
ABM0438	4"	1.5mm	18,000	3/8" (10mm)

These items, or any other Alpha® products, can be purchased through our extensive dealer network. To locate a dealer near you, contact our sales or customer service departments at (800) 648-7229.
