
PRESS RELEASE

Alpha® Introduces New Concrete Products

Oakland, NJ

8/18/2008

Alpha Professional Tools® is proud to announce that we are expanding our line of quality products and have developed several new products for the concrete industry. We have also created a number of unique products for our existing stone, glass and tile industries. Below is an introduction of these new products.

- **Ecogrinder** – Virtually dust-free grinding without the need for a vacuum system.
- **Grinding Cup Wheels** – Ideal for surface preparation after removal of floor covering materials.
- **Dust Bag Carriage** – A convenient rolling dust bag carriage allows for easy movement as you grind or cut using our Ecogrinder or Ecocutter.
- **Concrete Profiling Wheel** – Create expansion joints or decorative edges.
- **Crack Chasing Wheel** – Repair concrete cracks easily with the unique V-cut style wheel.
- **Ecocutter (ECC-125)** – This dry cutting saw is perfect for crack chasing, architectural scoring as well as stone and tile cutting.
- **Ecocutter Carriage Extension** – This extension connects to our AWS-UCAM for use with our Ecocutter and our Aluminum Guide Rails.
- **Hot-Rod Blade 3/16"** – This new blade is designed for cutting 3/16" grooves for removing tile grout.
- **Corner Nippers** – These convenient nippers cut the corners of glass easily without chipping.

These items, or any other Alpha® products, can be purchased through our extensive dealer network. To locate a dealer near you, contact our sales or customer service departments at (800) 648-7229.
