

## PRESS RELEASE

### Alpha® Introduces Contractor and Fabricator Kits

Oakland, NJ

1/25/2008

Alpha Professional Tools® is proud to introduce a new line of product kits. These kits are designed to provide the contractor, fabricator or installer the necessary tools to complete a variety of applications as well as expand their offerings to their customers. The kits are described below:

The **Tile Bullnose Kit** was designed to create a bullnose edge on tile or stone and polish it to a factory quality finish with a few simple hand-held tools. The kit includes an electric polisher, profiler, backer pad, Ceramica EX discs and an apron. We have also included a DVD that shows the kit in action as well as other related products.

The **Scratch Removal Kit** was designed with stone fabricators in mind. This kit comes with everything you need for scratch removal and seam polishing in the field. Start with the How-To Video to learn the proper scratch removal technique, then utilize the Alpha® Twistouch Turbo system to polish the flat surface without the wavy finish caused by most flexible polishing discs. Expand your client base and offer this value added post-installation service by using the Alpha® Scratch Removal Kit!

The **Countertop Trim Kit** was created for those who work with pre-fabricated countertops and have the need to trim the piece for a custom fit. The kit combines our AWS-125 Wet Stone Cutter with a universal carriage assembly and a 4' guide rail to create a clean, straight cut. All of the products are made of high-quality construction and are easy to setup and operate. A must for anyone that may be cutting and trimming slabs!

These kits, or any other Alpha® products, can be purchased through our extensive dealer network. To locate a dealer near you, contact our sales or customer service departments at (800) 648-7229.
