

PRESS RELEASE**Alpha® discontinues VSP-110, introduces VSP-120**

Oakland, NJ January 8, 2008

Effective immediately, Alpha Professional Tools® has discontinued the production and sale of the VSP-110 Electric Variable Speed Polisher from our product line. This also serves as an opportunity to introduce our VSP-120 Variable Speed Electric Polisher.

We will continue to repair the VSP-110 and sell spare parts as needed to support the units already sold. Many of the parts are interchangeable with the VSP-120, so we are certain availability for parts and repair will be sufficient.

The VSP-120 has many new features. Our new Variable Speed Electric Polisher comes with a variable speed control switch that has an automatic speed feed-back system to maintain consistent RPMs with or without a load. The range of the RPMs has been extended from 500 RPM to 2800 RPM. The new VSP-120 also includes a unique splash guard which reduces water spray and protects the motor housing.

We are currently accepting orders for this product and expect to begin shipping at the end of January.

If you have any questions or need additional information, please visit our website at www.alpha-tools.com or contact your sales or customer service representative at (800) 648-7229.
